

## 1 Product description:

"EX5 (GM 9450 F) is a high Density polyethylene with Butene-1 as comonomer.  
It is a high molar mass for blown film with in comparison to EX4 lower stiffness and increased tenacity.  
The product has good toughness, low gel level and good tear strength.  
Stabilization: Ca-Stearate, Zn-Stearate, Irgafos 168v

## 2 Technical Data

- ◆ Food Grade.
- ◆ Blown films with paper like quality.
- ◆ Suitable for counter bags.
- ◆ Carrier bags.
- ◆ Wrapping films and sheets.
- ◆ Blending partner
